

GC ORTHODONTICS STUDY CLUB

II MODULE

Comprehensive orthodontic training program that starts with learning basic knowledge and concludes with practical work on typodonts.

Each module includes both theoretical and practical hands-on teaching.

The group size is limited. A smaller group enables internal collaboration and discussions within the group.

The training is conducted in English.

3 DAY COURSE, INCLUDING HANDS ON

LECTURE TOPICS

IPR protocol

Intermaxillary elastics

Finishing protocol

Debonding protocol

Retention (fixed retainers, wraparound, myofunctional, essex)

TAD's - all you need to know - transverse, vertical, sagittal

CI II and CI III treatment - from inception to orthognathic surgery

Hybrid treatments - Aligners +... How to make a hard case easy and treat it with aligners

Case discussions

Hands on: participants will practice on printed models

Insertion of TAD's, modeling direct and indirect anchorage systems
