

TOOTH ERUPTION: FROM NORMAL TO ABNORMAL FROM THEORY TO CLINICAL PRACTICE

1 day course

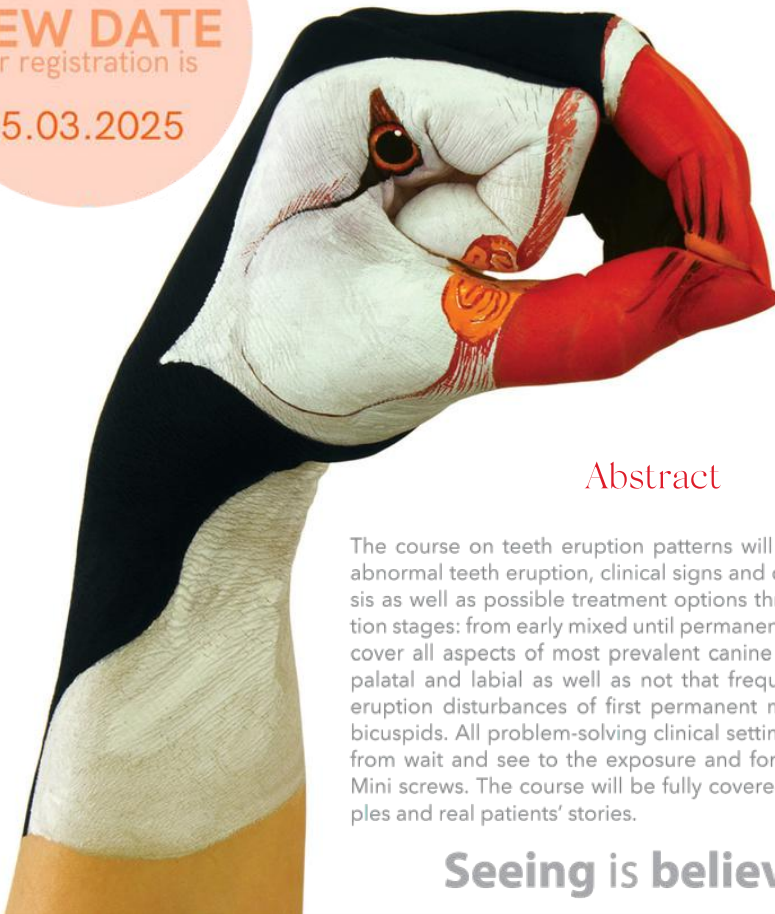

14th of March

Hotel Mövenpick Tallinn, Estonia

14.03 group is full!

NEW DATE
for registration is

15.03.2025

Abstract

The course on teeth eruption patterns will cover normal and abnormal teeth eruption, clinical signs and differential diagnosis as well as possible treatment options throughout all dentition stages: from early mixed until permanent dentition. We will cover all aspects of most prevalent canine impactions - both palatal and labial as well as not that frequent but important eruption disturbances of first permanent molar, incisors and bicuspid. All problem-solving clinical settings will be covered from wait and see to the exposure and forced eruption - from Mini screws. The course will be fully covered by clinical examples and real patients' stories.

Seeing is believing

IGC

Program

1. Normal tooth eruption: pattern, time and sequence according to body type.
2. Abnormal teeth eruption: clinical signs and symptoms. Making diagnosis right: normal delayed or abnormal impacted?
3. Guiding abnormal eruption from early mixed to late mixed dentition. When and how to intervene?
4. Labially impacted canines: diagnostic and treatment objectives. Clinical management.
5. Palatally impacted canines: diagnostic and treatment objectives. Canine first approach or traditional archwire anchorage traction?

Dr. Rūta Almonaitienė

graduated from the Vilnius University orthodontic program and received her MSc in orthodontics in 2005. In 2014, she completed her PhD in Philosophy in Biomedical Sciences with a thesis titled "Permanent Teeth Emergence Time and Growth of the Face and Jaws of Lithuanian Children."

Dr. Almonaitiene has been actively involved in both private and public orthodontic practices (at the Zalgiris Clinic of Vilnius University) as well as academic work as an Assistant at Vilnius University since 2006. She teaches both undergraduate students and postgraduate orthodontic residents at the Vilnius University Zalgiris Clinic. Leading the department of orthodontics.

Additionally, doctor has published articles on topics related to permanent teeth eruption, and her students consistently partici-

partate at national and international scientific conferences, presenting scientific reports on the subject. Dr. Ruta Almonaitiene lectures at national and international dental conferences and her lectures are well accepted by the audience.

Course fee:

Doctors: 350€ early bird (till 31st of December 2024), late bird - 450€

Includes:

- Certificate with hours
- Coffee and lunch breaks
- *VAT will not be added

Residents: 150€
